

AutoShack Weekly Tip

ASWTJuly192020

LOW FUEL LEVELS AND FUEL PUMP LIFE

- One of the most common causes of fuel pump damage is frequently driving a vehicle on very low fuel levels.
- This is because the fuel pump is lubricated and cooled by the fuel.
- If the fuel level stays too low too often, the pump will run much hotter too often.
- This can reduce fuel pump life.
- It's recommended that you don't let your fuel level drop below 1/8th too often.
